

To whom it may concern,

The Tesla Model S is fitted with an anti-theft system approved to the requirements in UNECE Regulation No. 116 (Uniform technical prescriptions concerning the protection of motor vehicles against unauthorized use).

UNECE R116 Approval Number: **E4-116R00/08\*1459**

Description of the system:

**Immobilizer**

Electronic immobilizer inhibits gearshift control on center display of user interface, blocking change of gear into Drive or Reverse until a valid key fob is present in the vehicle.

**Alarm**

Sensors fitted to each passenger door, the bonnet and tailgate that sounds the alarm sounder when they are opened.

Model S security package includes following systems:

- Intrusion sensor: Detects movement inside the passenger compartment or an intruder reaching in through a front window and will sound the alarm.
- Tilt sensor: Detects if the vehicle is being lifted onto a tow truck and sounds the alarm.

Kind Regards
